

# Portable Cart Mounted Reactor System

The cart mounted Reactor system is designed for the commercial application of foam insulation and protective coatings where maneuverability and flexibility are necessary. Mounted on a heavy duty steel cart, this portable unit rolls in where hose lengths are un-able to reach.

## FEATURES

- Runs off 230 VAC single phase power
- Up to 200 feet electrical cord
- 60 foot heated hose
- 10 gallon capacity (20 and 30 gallon also available)
- Air purge fusion gun
- Hose hanger
- Desiccant air dryer

## OPTIONS

- 5, 10, or 15 gallon pressure pots
- Gun flush kit
- Recirculation kit
- Agitator for B component

## TECHNICAL SPECIFICATIONS

Dimensions ..... 71”L x 30”W x 60”H  
 Dry Weight.....835 pounds  
 Power requirements ..... 230 VAC 1 PH. 50 Amp  
 Proportioner ..... Graco Reactor  
 Gun ..... Air Purge Fusion gun  
 Hose .....7 watts/ft. heated hose  
 Air preparation ..... Filter- 40 micron  
 Air preparation ..... Dryer- regenerative desiccant

## TYPICAL APPLICATIONS

- Inside hallways for high rise buildings
- Floor Markings and coatings
- In-plant flexible work cells
